top statuses by total salary spend

Showing results for Top 10 status of HR data MNC data by total salary spend of those HR data MNC data

Department contributed the most to the Increase of Salary_INR. When Department was IT, Salary_INR Increased by 3,40,397.04.

Salary Flow Analysis

- The total salary spend across all departments is \$17.03B, with IT being the highest contributor.
- IT, Sales, and Operations collectively account for the major share of salary distribution, highlighting their strategic importance.
- Senior roles like CTO and IT Managers significantly drive up salary costs, while entry-level roles such as Data Analysts have relatively lower contributions.

Key Influencers of Salary

- The analysis shows that department is the most critical factor influencing salary levels.
- Salaries in the IT department are, on average, \$340K higher than other departments, making IT the highest-paid domain.
- Other functions such as Finance, R&D, and Sales follow but at comparatively lower averages.

Employee Status & Salary Spend

- A majority of salary spend is concentrated on Active employees, reflecting a stable workforce.
- Resigned and terminated employees represent notable salary costs, underlining the need for attrition control measures.
- Retirement-related salary spend remains minimal, suggesting a relatively younger workforce distribution.

Business Insights

- IT talent is both the most expensive and the most valuable, requiring careful workforce planning and retention strategies.
- High attrition-related salary spend indicates an opportunity to enhance employee engagement and retention policies.
- Salary structures across departments highlight the importance of aligning compensation strategy with performance and experience levels.
