PROFESSIONAL SUMMARY

MBA (Business Analytics) graduate with Microsoft Certified Fabric Analytics Engineer Associate (**DP-600**). Strong foundation in Microsoft Fabric, Power BI, SQL, Advanced Excel, and Python for data analysis and business intelligence. Skilled in data cleaning, data modeling, DAX, Power Query, dashboard development, and transforming raw data into actionable business insights. Built interactive dashboards including Enterprise Sales Analytics and Credit Card Financial Analytics projects. Passionate about solving business problems through data-driven decision-making.

TECHNICAL SKILLS

- **Microsoft Fabric** : OneLake | Lakehouse | Dataflow Gen2 | Data Pipeline | Direct Lake | Semantic Model
- **Data Visualization** : Power BI | DAX | Power Query | Data Modeling | Dashboard Development | KPI Reporting
- **Data Analysis** : Advanced Excel | Pivot Tables | XLOOKUP | Power Query | Data Cleaning
- **Database** : SQL | MySQL | Joins | CTEs | SQL Analytics Endpoint | Data Warehouse | ETL | Medallion Architecture
- **Core Capabilities** : MIS Reporting | Data Cleaning | Data Visualization | KPI Analysis | Business Intelligence

EXPERIENCE

- **Techno Kraft Services LLP | Data Analyst Intern | Nashik, Maharashtra.** (Aug2025– Sep2025)
 - Developed **interactive Power BI dashboards**, reducing manual reporting effort by **~30%**.
 - Performed data validation, reconciliation, and quality checks across **5,000+** records, improving reporting accuracy by **25%**.
 - Improved data processing efficiency by **20–30%** through **structured data cleaning techniques**.
- **Deloitte Virtual Internship | Data Analyst | Remote** (June2025– July2025)
 - Analyzed business data and translated findings into actionable business insights using data analytics techniques.
 - Built Power BI dashboards and automated MIS reports reducing manual effort by **40%**.
 - Wrote optimized SQL queries (joins, subqueries, CTEs) to extract actionable insights.

PROJECTS

- **Credit Card Financial Dashboard | Tools: SQL, Power BI, Data Modeling, ETL. [GitHub URL](#)**
 - Designed relational data models and reporting datasets for KPI tracking.
 - Implemented DAX measures and Power Query transformations.
 - Performed data validation and reporting accuracy checks.
- **Enterprise Sales Analytics using Microsoft Fabric | Tools: OneLake, Lakehouse, Power BI , SQL. [GitHub URL](#)**
 - Engineered an end-to-end analytics platform using Microsoft Fabric.
 - Automated ETL with Dataflow Gen2, Lakehouse, Data Pipeline, and PySpark.
 - Delivered enterprise insights through Star Schema, Semantic Model, and Power BI Direct Lake.

CERTIFICATIONS

- Microsoft Certified: Fabric Analytics Engineer Associate (DP-600) | **Microsoft** | Jul 2026 [URL](#)
